

impARAS

4th International Conference

Improving Allergy Risk Assessment Strategy for new food proteins

June 19- 21st, 2018

Dipartimento di Agraria, Università di Napoli, Royal Palace of Portici

Naples, Italy

CALL FOR PAPERS

Important dates

May 6th 2018: Deadline for Abstract Submission

May 13th 2018: Selection /acceptance abstracts

May 28th 2018: Publication of final program

June 1st 2018: Deadline for registration

Invited speakers

Lucien Harthoorn: *"non-IgE mediated allergies"*

Cecilia Berin: *"Immune profiling of pediatric food allergic cohorts"*

Paul Turner: *"Determinants of severity: predicting life-threatening anaphylaxis reactions"*

Roberto Berni Canini: *"Gut microbiome as potential target for food allergy treatment"*

Topics

- Flash presentations of STSMs
- Intrinsic properties of allergens, including processing, matrix, physical/chemical, digestion, bioinformatics, protein purifications and analysis
- In vitro and in vivo methods to unravel mechanisms of (food) allergy and activation of innate and adaptive immune system
- Allergenicity risk assessment, including current status, examples and applications (novel food dossiers) and visions
